

# TW860-960-Q18L60-M-B42

## UHF Tag

### Features

- EEPROM, memory 40 byte
- TID serial number: 6 byte
- For direct mounting on metal

### Functional principle

The UHF read/write heads form an air interface the size of which may vary, depending on the combination of read/write head and tag.

The read/write distances mentioned here only represent standard values measured under laboratory conditions and free from any influences caused by materials. Attainable distances may vary due to component tolerances, mounting conditions, ambient conditions and material qualities, especially when mounted in metal. Testing of the application under real operating conditions is therefore essential, especially with read/write on-the-fly!
